SUMMARY

Passionate developer with a strong foundation in JavaScript, NextJS, NodeJS and TailwindCSS. Possesses excellent adaptability and can work efficiently in both team and independent work environments, with a strong drive to master legacy technologies and explore new systems.

TECHNICAL SKILLS

HTML5, CSS3, Tailwind CSS, Bootstrap5, JavaScript, TypeScript, ES6, React JS, GitHub, Node JS, Express JS, NoSQL, Firebase, MongoDB, Next JS, Redux, RestAPI, WordPress, PHP, jQuery, Figma

EXPERIENCE

FULL STACK DEVELOPER, INVENT

JAN 2023 – PRESENT

- Designed and engineered a React web app from the ground up to present Invent with an online portal for client landing pages and a booking system.
- Utilized a headless Firebase authentication system allowing 10,000 authentication requests per day (such as email/password, phone authentication, third-party authentication.) for free and 100,000 requests per month. All of this was at no cost to the company drastically reducing their operation cost.
- Developed an emailing system where 200 appointments per days are free.
- Created a system of SEO tracking in the head of each page to help the website based on LightHouse standards.
- Used React's composability features to develop the website in an easy-to-maintain way.
- Leveraged Tailwind and vanilla CSS to create a responsive design whilst keeping the markup clean and easy to maintain.
- Processed Data on the backend via NodeJS, ExpressJS, MongoDB. Hostinger is used for its affordability and user-friendliness. It helped to save around 80% on manual marketing campaign for the company in Dhaka.

FRONT END DEVELOPER, VECTOR DESIGN US, INC.

JAN 2022 – DEC 2022

- Created a custom website supporting more than 10,000 users.
- Utilized modern UI Stack conventions developing with: WordPress, PHP, Vanilla CSS and jQuery.
- Provided technical support for more than 100+ clients and developed pages using HTML, CSS.
- Managed a user guide to help promote site features and management of the websites.
- Used Astra Pro for lightweight and fast themes, Yoast SEO for search engine optimization, Contact form 7 for simplification of managing contact, Askismet for filtering out spammers and others.
